Vuzix Reports First Quarter 2020 Results and Business Outlook

ROCHESTER, N.Y., May 11, 2020 - Vuzix® Corporation (NASDAQ: VUZI) (“Vuzix” or, the “Company”), a leading supplier of Smart Glasses and Augmented Reality (AR) technologies and products, today reported its first quarter results for the period ended March 31, 2020.

“In our first quarter of 2020, we received initial and subsequent follow-on orders for our M400 Smart Glasses from a growing number of customers and partners involved in telemedicine, which helped drive our M-Series Smart Glasses revenue up by 43% year-over-year,” said Paul Travers, President and CEO of Vuzix. “We also had demonstrable success with our Engineering Services efforts by entering into an agreement with a second major U.S. defense contractor to develop a customized waveguide-based optics engine. We continued our expense management efforts and successfully reduced our operating expenses by almost one million dollars on a comparable period over period basis as we continue our efforts to achieve profitability.”

“The COVID-19 Pandemic had an impact on the day-to-day operations of many domestic and foreign businesses, including Vuzix, and despite a challenging enterprise environment, we achieved modest revenue and gross profit growth in the quarter. Vuzix advised non-production employees who could work from home that they should set-up home offices so that production employees could remain on-site assembling smart glasses over split shifts, which minimized risk to floor personnel but still allowed us to meet customer demand for our M400 and Vuzix Blade products,” continued Mr. Travers.

The following table compares condensed elements of the Company’s summarized Consolidated Statements of Operations data for the three months ended March 31, 2020 and 2019, respectively:

	For 3 Months Ended March 31,	
	2020	2019

Loss Attributable to Common Stockholders per Share	\$ (0.18)	\$ (0.25)

First Quarter 2020 Financial Results

For the three months ended March 31, 2020, total revenues increased \$0.2 million to \$1.5 million versus the comparable period in 2019. The increase was driven by higher sales of smart glasses products, which rose 8% year-over-year, and engineering services revenue of \$0.2 million versus none in the prior year's period.

There was an overall gross profit of \$81,000 for the three months ended March 31, 2020 as compared to a gross profit of \$40,000 for the same period in 2019. On a product cost of sales basis only, product direct costs were 54% of sales in the 2020 period as compared to 52% in the prior year's period, the change primarily the result of lower selling prices for the M300XL in the first quarter of 2020 versus the same period in 2019.

Research and Development (R&D) expense was \$2.0 million for the three months ended March 31, 2020 compared to \$2.5 million for the comparable 2019 period, a reduction of approximately 20%. The decrease in R&D expense was primarily due to reduced external consulting fees related to Blade software development.

Selling and Marketing expense was \$1.2 million for the three months ended March 31, 2020 compared to \$1.4 million for the comparable 2019 period, a reduction of approximately 19%. The decline was largely due to decreases in advertising and trade show costs, salaries and stock-based compensation and external consulting fees.

General and Administrative expense for the three months ended March 31, 2020 was \$1.5 million versus \$1.9 million in the prior year's period, a reduction of approximately 19%. The decline was largely due to decreases in legal fees and IT and security consulting fees.

Total Operating Expenses decreased by \$1.0 million for the three months ended March 31, 2020, a reduction of approximately 15%.

The net loss attributable to common stockholders after accrued preferred share dividends for the three months ended March 31, 2020 was \$5.9 million or \$0.18 cents per share versus a net loss of \$6.8 million or \$0.25 for the same period in 2019.

Net cash operating loss after adding back non-cash adjustments for the first quarter of 2020 was \$4.3 million as compared to \$5.3 million for first quarter of 2019, a decrease of 19%. As of March 31, 2020, the Company maintained cash and cash equivalents of \$6.1 million and an overall working capital position of \$11.8 million.

Management Outlook

“We have made steady progress so far this year to meet our operating goals for 2020, but we have more work to do. The COVID-19 Pandemic has disrupted business operations worldwide, but it has also awakened the enterprise smart glasses industry, particularly across telemedicine, field service and remote support and manufacturing. Since mid-March, when businesses, states and countries began to shut down and work remotely across the globe due to COVID-19, Vuzix began to witness a pivoting of the enterprise smart glasses industry,” said Paul Travers, President and CEO of Vuzix. “We have recently experienced increases in the average order size, number of orders and re-orders from direct customers and resellers for our M400 Smart Glasses. Thus far in our second quarter ending June 30, 2020, smart glasses revenue, along with revenues associated with recently signed Engineering Services programs expected to conclude before quarter’s end, have already exceeded our 2020 first quarter revenues. We have also expanded the number of our contracted Engineering Services program engagements and are actively pursuing additional Engineering Services and OEM programs. Additionally, we continue to make great strides in our efforts to develop our next generation waveguide and display engine technologies around MicroLEDs with new strategic partners. Finally, in terms of our cash flow, Vuzix has trimmed its operating costs and will continue to be prudent in our spending while focusing on revenue generating initiatives that can maximize our cash flow from operations.”

Press Release

Vuzix Announces Closing of \$11,250,000 Offering

ROCHESTER, NY, May 13, 2020 – Vuzix® Corporation (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that it closed the previously announced \$11,250,000 million registered direct offering of common stock on May 13, 2020. The company entered into agreements on May 11, 2020 relating to the sale of 5,000,000 shares of its common stock at an offering price of \$2.25 per share. The gross proceeds from the offering were \$11,250,000 before deducting commissions and estimated offering expenses. The Special Equities Group, a division of Bradley Woods & Co., Ltd. acted as sole placement agent for the offering. The company has filed a prospectus with the Securities and Exchange Commission, which can be viewed at https://www.sec.gov/Archives/edgar/data/1463972/000110465920060228/tm2019416-2_424b5.htm.

The Company estimates the net proceeds from this offering are approximately \$10.6 million, after deducting placement agent fees and estimated offering expenses payable. As noted earlier, the Company intends to use the net proceeds from the offering for general corporate purposes, including working capital to accelerate the building of finished goods inventory to address increasing customer demand.

This press release does not constitute an offer to sell, or the solicitation of an offer to buy, any securities described herein, nor will there be any sale of these securities in any state or other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction.
